DETAILED ACTION

Allowable Subject Matter

1. **Claims 1-16** are allowed.

The following is an examiner's statement of reasons for allowance:

2. **Claims 1-16** are allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior art references which teaches establishing a second point-to-point connection to the other digital device, when the result of step (b) indicates that the digital device, which establishes the first point-to-point connection, is not the other digital device to be connected by the first point-to-point connection or logical equivalent. In particular, U.S. Patent Application 2003/0172201 A1 to *Hatae et al.* teaches in figure 4b a bypass logical connection for a serial bus (i.e., IEEE 1394); however, the connection is part of a *broadcast* connection, see e.g., paragraph 0220-0223 on page 10. Specifically, examiner notes the difference in applicant's specification with respect to a *point-to-point connection* and *broadcast connection*, see e.g., page 1, lines 25-31 of applicant's specification with respect to a bus connection. Thus the examiner could not find a reference that expressly or inherently teaches the above limitation in the spirit and scope of applicant's invention solving the problem as presented by the applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
